

Tax Time Enrollment

Plan Year	C4 Submissions (individuals)
2022: Year 1	2,447
2023: Year 2	5,089
2024: Year 3	2,949
2025: Year 4 (as of June)	1,122

This is consistent with trends seen in other states with tax time programs, which see a decline in submissions over time as saturation of reached.

We are still receiving a fair number of blank records from the DOR and unable to send notices to those households. This happens when someone checks the box but does not fill out form DR 0104EE. Most e-filing software auto-fills this form, but a few do not.

Goal for next year: collaboration with DOR regarding joint messaging to tax filing software companies to increase support of form DR 0104EE.
